

## Automatic spray gun A 20

### Special features

- Perfect for furniture glue spray application
- Equipped with our new XLINE air nozzle generation
- Light weight for fast moving coating machines and robots
- Dedicated air nozzles available for flat surfaces, edges and grooves
- Spray gun change via quick-change adapter without tools within seconds
- The adapter is permanently installed in the system, always ensuring the exact TCP (Tool Centre Point) when the spray gun is changed
- Re-adjustment of the spray parameter is not necessary after change of spray gun
- All connections for coatings and air are integrated with the air control in the adapter
- Air nozzle positioning, fixed adjustment in 45° increments. Any other positions also possible
- Available with and without needle stroke adjustment

- Various extensions and coating circulation option available
- Aluminum version coated with high-quality aluminum oxide polymer composite layers for easy cleaning and for high durability

### Technical data

- W 95 mm, H 77 mm, L 145 mm
- Weight of aluminium version with adapter: ca. 750 g
- Weight of stainless steel version with adapter: ca. 1450 g

### General specifications

- Working pressure control air max. 4 - 8 bar
- Working pressure spray medium max. 12 bar
- Working pressure atomiser air max. 8 bar
- Noise level depends on the nozzle
- approx. 73 - 96 dB(A)
- Spray medium temperature max. 50 °C
- Control and atomiser temperature max. 50 °C
